

# The Girls in Engineering and Robotics Symposium

*Being female in Robotics is no longer an oddity – but there are unique elements that girls bring to robotics that need reflection and celebration. This symposium is a chance for the girls of FTC to see how their involvement impacts their careers in engineering and robotics, as well as learn how best to utilize their knowledge to improve their futures.*

## 4 TRACKS:

- 1) **Role Models**- How have others succeeded? What can you learn from them?
- 2) **Next Step**- What's next? How can you pursue this in college?
- 3) **Workshops**- Gain some technical knowledge in workshops taught by experts!
- 4) **Celebrate**- What do you bring to the table as a woman?

## INCLUDING:

- A Guide to Soldering
- Public Speaking
- Professionals from WPI

**AND MORE!**

October 1st, 2022

Andover High School

9:00am - 4:30pm
